

5601 Bano toilet grab bar non-adjustable 900mm

bilde mangler

5601 Bano toilet grab bar non-adjustable 900mm

Bano toilet grab bar non-adjustable, mounting on wall

The generous length provides good ergonomic support. By bending forwards and using upper body strength, users can easily move on and off the toilet. The end of the grab bar has a smart designed “handle” that provides a good, secure grip. When it is not in use, the grab bar can be folded up against the wall to free up floor space.

Load tested up to 250kg.

Materials

- Structural foam with polyurethane coating
- Natural anodized aluminum alloy
